

Cyclura stejnegeri

Mona ground Iguana

Family (Iguanidae)

Kingdom (Animalia)

Status (Threatened)

Description

Mona ground iguanas are massive, primeval-looking lizards growing 3 to 4 feet in length, with several small horns protruding from the snout, two prominent bulges crowning the head, sagging jowl muscles in older individuals, a throat fan or dewlap, a crest along the back, and wrinkled skin of a dark brown color.

Location/Habitat

The *Cyclura stejnegeri* is found on Mona Island, an extension of Puerto Rico. The island is uninhabited, which means they have no problem reproducing and thus avoiding extinction.
