

Eleutherodactylus juanariveroi

Llanero Coqui

Family (Eleutherodactylidae)

Kingdom (Animalia)

Status (Endangered)

Description

The *Eleutherodactylus juanariveroi* is a critically endangered species of frog endemic to Puerto Rico. It is the smallest of the Puerto Rican coquí frogs, reaching only the size of a dime when fully grown. This frog is a palustrine wetland specialist, meaning it thrives in herbaceous wetlands with emergent vegetation.

Location/Habitat

The coquí llanero is currently known to be restricted to one freshwater herbaceous wetland in the municipality of Toa Baja, Puerto Rico.
