

Pleodendron macranthum

chupacallos

Family (Canellaceae)

Kingdom (Plantae)

Status (Endangered)

Description

Aromatic evergreen tree of small to medium size that can reach up to 10 meters in height. It has simple, leathery leaves that are glossy on the upper surface, with well-defined veins. Its flowers are solitary, white, and bisexual, with multiple petals and stamens, while its fruit is dark, aromatic, and contains several seeds. The tree's wood is light-colored, hard, and heavy.

Location/Habitat

The species can be found in two types of habitats in different areas: in subtropical humid forests and/or in the lower montane zone of Puerto Rico's tropical forests.
